

Empowering Your Recovery Post-Chemotherapy

Naturally Rejuvenate, Restore, and Rebuild

Purobest - AKBA LPX 200, 200 mg Boswellia Serrata std to 90% AKBA

Nutraceutical to fight against cancer and recurrence prevention after chemotherapy.

Main Action: Harness the strength of **90% AKBA** for robust **post-chemotherapy** recovery, targeting vital inflammatory pathways. AKBA exhibits anti-cancer effects by inducing **apoptosis** causing cell cycle arrest, suppressing **autophagy**, and inhibiting **metastasis** in various organs. Its targeted actions involve specific genes related to **cell cycle regulation** and **apoptosis**, impacting pathways such as PI3K/Akt.

Specific benefits: Alleviate pain, address side effects, and shield healthy cells after chemotherapy.

When to Prescribe: Reco) and add for cancer survivors **after chemotherapy**, aiding in recovery from **glioblastoma**, managing **cancer-related pain**, reducing **blood inflammatory parameters** (CRP and ESR), and combating **drug resistance**.

Major Contraindications: Not recommended for individuals with severe **bleeding disorders** or **severe gastric issues**. Avoid use **one day before** and **two days after chemotherapy**.

Dosage: 1 Capsule OD

Purobest - Quercetin LPX 1000, 1000 mg of 95% Quercetin with 150 mg of Bromelain

Nutraceutical supporting recovery after chemotherapy.

Main Action: Quercetin LPX 1000, enriched with **95% quercetin**, is a potent **post-chemotherapy nutraceutical** with anticancer effects in **ovarian, gastric, and breast cancer cells** through anti-proliferative and pro-apoptotic actions. It induces **apoptosis** (BCL2, Bax, Caspase), cell cycle arrest, reduces inflammation (IL-2, IL-6, TNF α , COX2), demonstrates antiangiogenic (VEGF, TGF β), prevents **chemo-resistance** (MDR1, MRP) and **antimetastatic properties**.

Specific benefits: Quercetin through **cell cycle inhibition, anti-metastatic properties**, supporting overall recovery and potential to sensitize and protect after chemotherapy.

When to Prescribe: Advised for cancer survivors **after chemotherapy**, promoting recovery from **brain tumors, breast cancer, lung cancer, and countering drug resistance**.

Major Contraindications: Not recommended for individuals with severe **bleeding disorders** or **severe gastric issues**. Avoid use **one day before** and **two days after chemotherapy**.

Dosage: 1 Sachet OD with mixed with 200 ml of water

AKBA LPX 200 and Quercetin LPX 1000 Nature's Support for Post-Chemotherapy Recovery. Prescribe with Confidence.
