

# Empowering Your Recovery After Chemotherapy

Naturally Rejuvenating, Restoring, and Rebuilding to Prevent Recurrence.

	<b>Purobest</b>	<b>Purobest</b>	<b>Purobest</b>
 <b>Product Name</b>	<b>Berberine LPX 250</b> 250 mg of Std to 97% Berberine	<b>Green Tea SPX 500</b> 500 mg of EGCG from Green Tea (Camellia Sinensis) Extract std to 40%	<b>Curcu LPX 2500</b> 2500 mg of 95% Curcuminoids
 <b>Main Action</b>	Berberine exhibits <b>Anti-cancer</b> effects across various cancer types by <b>inhibiting proliferation</b> , <b>suppressing metastasis</b> , and inducing <b>apoptosis</b> through interactions with <b>microRNAs</b> and inhibition of the <b>BCL-2/BAX signaling pathway</b> . Potentially involves overcoming multidrug resistance ( <b>MDR</b> ) and improving the efficacy and safety of existing cancer treatments.	EGCG induces <b>apoptosis</b> and cell growth arrest by <b>inhibiting MAPK</b> , <b>activating FOXO genes</b> , and <b>reducing ET-1</b> expression through <b>Akt- and AMPK-stimulated FOXO1</b> regulation, involving key proteins like <b>calmodulin</b> and multiple pathways such as <b>angiogenesis and AP-1 inhibition</b> . EGCG causes <b>modulation</b> of genes, including <b>FOXO</b> , and inhibition of proteins like <b>AP-1</b> , <b>impacting pathways</b> crucial for cell survival and <b>angiogenesis</b> .	Curcumin upregulates <b>E-cadherin (adhesion promoter)</b> and <b>downregulates vimentin &amp; N-cadherin (migration enhancers)</b> , restoring <b>cell connections</b> and hindering escape. It triggers <b>programmed cell death in chemotherapy resistant cells</b> , eliminating them and reducing overall tumor burden.
 <b>Specific benefits</b>	It benefits <b>cancer treatment</b> , inhibits <b>metastasis</b> , induces <b>apoptosis</b> , and overcomes <b>resistance</b> .	It induces <b>apoptosis</b> , arrests <b>cell growth</b> , and <b>modulates key genes and pathways</b> , potentially enhancing treatment outcomes by targeting <b>multiple aspects</b> of cancer.	Stimulates <b>cell death in chemotherapy-resistant cancer cells</b> .
 <b>When to Prescribe</b>	For recurrence avoidance post treatment and for improved efficacy during treatment	Advised for cancer survivors <b>after chemotherapy</b> for <b>recurrence avoidance</b> .	Recommended for cancer survivors after chemotherapy for recurrence avoidance
 <b>Major Contraindications</b>	Not recommended for individuals with severe bleeding disorders or severe gastric issues. Avoid use one day before and two days after chemotherapy.	Not recommended for individuals with severe bleeding disorders or severe gastric issues. Avoid use one day before and two days after chemotherapy.	Not recommended for individuals with severe bleeding disorders or severe gastric issues. Avoid using one day before and two days after chemotherapy.
 <b>Dosage</b>	1 Capsule BD	1 Tablet OD	1 Sachet OD diluted in 300 ml of water and taken over 15-30 minutes

**Berberine LPX 250 and Green Tea SPX 500 and Curcu LPX 2500 Nature's Support for Recurrence avoidance and Post-Chemotherapy Recovery. Prescribe with Confidence.**
